

Alessio Garifo

Full-Stack Software Developer | PHP, Laravel, Vue.js, MySQL, Google Cloud

Amsterdam, Netherlands | alessiogarifo92@gmail.com | Portfolio: alessiogarifo92.github.io/portfolio

LinkedIn: linkedin.com/in/alessio-garifo-a89697128 | GitHub: github.com/alessiogarifo92

SUMMARY

Full-Stack Developer with 5 years of experience building and maintaining production web applications with PHP/Laravel, Vue.js and MySQL on Google Cloud. Strong in REST API design, third-party integrations, legacy modernization and ticket-driven troubleshooting, with hands-on use of AI coding assistants and AI agent workflows.

TECHNICAL SKILLS

Backend: PHP, Laravel, RESTful APIs, OOP, MVC architecture, third-party API integrations

Frontend: Vue.js, JavaScript (ES6+), TypeScript, HTML5, CSS3 / SASS, Tailwind CSS, Bootstrap, jQuery

Databases: MySQL, PostgreSQL, SQLite, database design, query optimization, caching / buffering strategies

Cloud & DevOps: Google Cloud Platform (GCP), Linux (Ubuntu), Git, GitHub Actions (CI/CD), VMware vSphere, Docker; Kubernetes (in progress)

AI & Automation: AI coding assistants (Claude Code), agent-based workflows, MCP integrations, LLM API integration, prompt design

Practices: Issue-driven development, debugging and root-cause analysis, refactoring, automated testing, technical support, SLA-based ticketing

PROFESSIONAL EXPERIENCE

Full Stack Developer | Flexpedia, Haarlem, Netherlands

02/2024 - Present

- Develop and maintain a large legacy business platform across backend (PHP/Laravel) and frontend (Vue.js), improving stability and reliability.
- Build and maintain third-party integrations and REST APIs connecting the platform to external services.
- Resolve support tickets end to end: bug reproduction, root-cause analysis, fixes and direct communication with users.
- Monitor and operate production infrastructure on Google Cloud Platform (GCP).
- Contribute to the project's AI transition and drive automation and process-optimization initiatives.

Back End Developer | Massimi Sistemi, Siena, Italy

06/2021 - 09/2023

- Took part in the full lifecycle (analysis, testing, implementation) of trust domain features, delivered to client satisfaction.
- Built buffering systems that improved database read performance and data-retrieval speed.
- Optimized existing code to reduce load times and fixed bugs, improving overall system stability.
- Wrote reusable, clean and readable code, making future changes faster and safer.

Full Stack Web Developer Trainee | Boolean Careers, Milan, Italy

09/2020 - 03/2021

- Intensive 6-month full-time bootcamp with daily hands-on projects: HTML, CSS/SASS, Bootstrap, JavaScript (jQuery, Vue.js), PHP and OOP, MySQL, Laravel.

SELECTED PROJECTS

Tisane Match - Web app and offline Android app (personal project)

- Taste-based recommender for 156 shelf products: a 5-step quiz builds a 12-note taste profile and every product gets an explained match score.
- Email and Google login (Socialite), reviews, admin panel; deployed on Render with Postgres (Neon); CI tests on SQLite and Postgres; Android APK with NativePHP built in GitHub Actions.

Laravel 13, PHP 8.4, Blade, Tailwind CSS, SQLite, PostgreSQL, NativePHP, GitHub Actions, Docker

Mix & Splash - Mobile puzzle game for Android and web (personal project, playable demo on the portfolio)

- 100 levels in 10 themed stages, each with a solution verified in simulation; levels generated and checked in CI.
- Unit tests with Vitest and end-to-end tests with Playwright; Android build with Capacitor.

TypeScript, Phaser, Vite, Capacitor, PWA, Vitest, Playwright

PS Plus Catalog - Full-stack catalogue web app (personal project)

- FastAPI REST API with PostgreSQL and a scheduled sync worker (retries with backoff, sync logs, last-good-data fallback); Nuxt 3 frontend in 10 languages; Docker Compose environment.

Python, FastAPI, PostgreSQL, SQLAlchemy, Nuxt 3, Vue, Tailwind CSS, Docker

Telegram Jobs Bot - Job-alert automation (personal project)

- Pushes new Laravel/PHP openings from 6 official APIs and RSS feeds to Telegram, with deduplication; serverless on two GitHub Actions schedules sized to each source's rate limits.

Python, Telegram Bot API, GitHub Actions, REST, RSS, pytest

EARLIER EXPERIENCE

Customer Care & Banking Back Office Clerk | GFT Technologies, Florence, Italy | 03/2013 - 07/2015: credit-card customer support and payment processing on AS400 systems.

International roles in hospitality, wine production and sales | Italy, UK and Australia | 07/2015 - 03/2020: including team leader managing a team of 6; customer-facing, quality-control and operational roles.

EDUCATION

Certificate, Full Stack Web Development (full-time bootcamp) | Boolean, Milan, Italy | 09/2020 - 03/2021

Technical High School Diploma in Surveying | ISIS Gramsci-Keynes, Prato, Italy | 09/2006 - 07/2011

LANGUAGES

Italian (native), English (professional working proficiency)
